SKILLS

- **Languages:** Python, C, C++, Java, SQL
- **Frameworks:** Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn, ReactJs, NodeJs, ExpressJs, Scikit learn
- **Tools/Platforms:** Selenium IDE, MS Excel, Power BI, MongoDB, MySQL
- **Soft Skills:** Problem-Solving, Adaptability, Quick Learner, Time Management

PROJECTS

Malicious URL Detection System | [GitHub](#) Oct' 25 – Nov' 25

- Created URL detection system using a 6 layer security pipeline combining machine learning, rule-based analysis, and real-time threat intelligence to identify phishing and malware threats.
 - Ensembled ML detection engine using Random Forest, Logistic Regression, Naive Bayes, and Isolation Forest with engineered URL features enabling high-accuracy classification and zero-day anomaly detection.
 - Designed Interactive Streamlit dashboard with real-time analysis, confidence scoring, and live threat intelligence integration from VirusTotal, URLScan.io, and AbuseIPDB.
- Tech:** Python, Numpy, Pandas, Matplotlib, Scikit-learn, Streamlit, Feature Engineering.

Urify – Url Shortner | [GitHub](#) Jul' 25 – Aug' 25

- Developed a modular backend using Node.js (Express MVC) with EJS and MySQL, featuring structured CRUD.
 - Implemented a comprehensive security layer with Sessions, JWT (Access/Refresh Tokens), Google OAuth 2.0, Argon2 hashing, Zod validation, and custom authorization middleware.
 - Achieved production-grade reliability through ACID transactions, complex SQL joins, email verification (Resend API), secure file uploads, and scalable architectural design.
- Tech:** HTML, CSS, Javascript, NodeJs, ExpressJS, MySQL, Ejs, Mjml

Smart Parking Space Prediction Model | [GitHub](#) Jan' 25

- Performed EDA and feature engineering on Bengaluru space data to clean outliers, engineer location, size features, and prepared the dataset for modeling with improved accuracy and reliability.
 - Built an interactive dashboard using Streamlit showcasing locality-wise price trends, distribution insights, and key market patterns for clearer decision-making and visual analysis.
 - Evaluated a regression-based ML model to accurately predict Parking Space prices based on location, size, and amenities, achieved an R^2 accuracy of approximately 92% on the test dataset.
- Tech stack:** Python, Pandas, NumPy, Scikit-learn, Feature Engineering, Streamlit, Data Visualization

TRAINING

Full Stack MERN Developer — [Cipher School](#) | [Certificate](#) Jul' 25

- Gained hands-on experience with React, Node.js, Express.js, and MongoDB, building a solid understanding of modern full-stack development. Developed core skills in API design, user authentication, and seamless database integration.
- Applied full-stack development skills in the Book Store project, implementing real-world development practices to build a functional and user-friendly application.

Tech stack: Python, Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, Power BI, Excel, SQL

CERTIFICATES

- Programing in Modern C++ | IIT Kharagpur | [Link](#) Jul' 24 – Oct' 24
- Backend Developer | PW Skills | [Link](#) Apr' 24
- Responsive Web Design | Free Code Camp | [Link](#) Nov' 23

ACHIEVEMENTS

- Solved 300+ Data Structure and Algorithms problems in C++ on Leetcode. Since Jul' 25
- Solved 450+ problems on NeoColab (C/C++/Java) Since Jul' 25

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.41	Since Aug' 23
Tiny Tots Senior Secondary Public School	Sultanpur, U.P
Intermediate; Percentage: 81.6 %	Apr' 22 – Apr' 23
Tiny Tots Senior Secondary Public School	Sultanpur, U.P
Matriculation; Percentage: 78.8%	Apr' 20 – Apr' 21
